1. Hailey builds a city out of craft sticks. The main road is 9 craft sticks long. Each craft stick is 12 centimeters long. How much longer than 1 meter is the road?
2. Molly has a length of yarn that is 4 feet long. She cuts it into equal pieces that are 4 inches long. How many pieces of yarn does Molly have?
3. Bob walks around a track that is 200 meters long. He walks around the track  $4\frac{1}{2}$  times. How many kilometers does Bob walk?
4. Mark buys a 3-pound bag of apples. He takes out some of the apples and measures the weight of those apples to be 1 pound 12 ounces. How many ounces of apples are left in the bag?

## Reflect On Your Learning

I'm  
confused.

I'm still  
learning.

I understand.

I can teach  
someone else.
