

**Multiple Choice :**

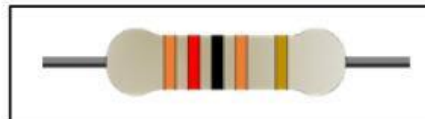

1 \_\_\_\_\_ is an electronic base used to build temporary electrical circuits.?

- A) Resistors
- B) Breadboard
- C) Capacitors

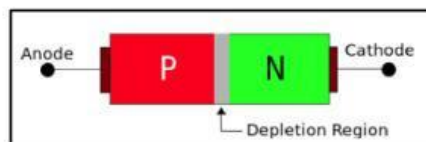

2. This is one of the most common electronic components used in electrical circuits. They are used to limit the current flowing through an electrical circuit.

- A) Capacitors
- B) Diodes
- C) Resistors

\_\_\_\_\_ are electronic components that allow current to pass in one direction only.

- A) Switches
- B) Diodes
- C) Resistors

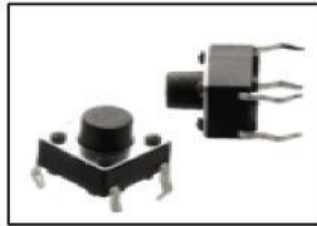

**Multiple Choice :**

\_\_\_\_\_ are used to permit or interrupt the flow of current in a circuit. You can think of switches as binary devices (1 or 0, on or off).

- A) Capacitors
- B) Diodes
- C) Resistors

In LED, the long leg is negative

- A) True
- B) False
