

Student name: _____

Practice Questions page 39

First Activity: Solve each equation by using the Square Root Property.

3. $9x^2 - 12x + 4 = 4$

9. $25x^2 - 20x + 4 = 75$

Second Activity: Solve the equation by using the Square Root Property.

15. $2x^2 - 28x + 98 = -200$

Challenge: Solve the equation by using the Square Root Property.

$3(2x-5)^2 + 12 = 120$
