

Life Skills Interactive Journal

Early Transition Skills – Teacher Guide (Ages 13–15)

Purpose

This Life Skills Interactive Journal is designed to support early transition skills for students ages 13–15. The journal helps students build self-awareness, independence, responsibility, emotional regulation, and pre-work behaviors while providing meaningful documentation for transition IEP goals. This journal is not meant to replace instruction. It is intended to be used as a reflection and practice tool alongside explicit teaching, modeling, and real-life activities.

Skill Areas Addressed

This journal targets foundational transition skills, including:

- daily routines and independence
- personal responsibility
- emotional awareness and coping strategies
- social boundaries and personal space
- following directions and school-based work behaviors
- goal setting and self-reflection

These skills align with early transition requirements and prepare students for more advanced transition planning in later grades.

How to Use This Journal

- Use 1–2 pages per week to avoid overload.
- Introduce each skill explicitly before completing the journal page.

Complete pages:

- after instruction
- after a real-life activity
- as part of a routine (morning meeting, weekly reflection, etc.)

Pages may be reused throughout the year to show growth.

Independence Ratings

Many pages ask students to check their level of independence (e.g., did it myself/needed help).

This promotes:

- self-awareness
- honest self-reflection
- valuable IEP data

Students should be encouraged to reflect accurately, not to choose the “best” answer.

Teacher Notes & IEP Connection Page

The Teacher Notes & IEP Connection page is designed to:

- document student performance
- record level of support needed
- collect evidence tied directly to transition goals

Use this page:

- after completing a section
- before IEP meetings
- for progress monitoring and data collection

Outcome

When used consistently, this journal helps students:

- understand their own skills and needs
- take ownership of routines and responsibilities
- begin developing transition readiness skills
- participate meaningfully in their transition planning
