B. The library closes at 6 PM on weekdays.
C. The library opens at 9 AM on Saturdays.
D. The library is open on Sundays.

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the following questions from 31 to 36.

Cars and trucks are surely convenient, and most of us couldn't live without them, but they have become very expensive to run and harmful to the environment. Gas prices have been increasing, and carbon-dioxide emissions from cars pollute the environment and contribute to global warming. As a result, hybrid cars and electric cars have been economical and **environmentally-friendly** alternatives to traditional vehicles. They would be a good choice for the near future.

Hybrid cars combine two sources of energy such as a battery-powered electric motor and an internal combustion engine. The driver decides which source of power is appropriate for a given journey. Short rides to the grocery store or the post office could use the electric motor, while weekends in the country may require the internal combustion engine.

Electric cars run on rechargeable batteries rather than fuel. They are rather quiet on the road. The best thing about them is they cause about 97% less pollution than regular cars. But there are some disadvantages, too. The battery runs out of energy after driving a short distance, and it takes much time to recharge the battery. Electric cars also are expensive. Their batteries are still expensive and wear out in just a few years.

31. Which of the following is the best title for the passage?
A. Cars of the Future B. Electric Cars. C. Hybrid Cars D. Hybrid Cars and Electric Cars

32. Traditional vehicles pollute the environment and contribute to global warming because
A. they use more gas.
B. they emit carbon-dioxide.
C. they are convenient.
D. they are necessary for US.

33. What are hybrid cars?
A. They are vehicles that have two electric motors.
B. They are vehicles that have two internal combustion engines
C. They can be used for short rides and long journeys.
D. They are vehicles that use two types of energy.

34. Which of the following is an advantage of electric cars according to the passage?
A. They cause about 97% less pollution than traditional cars.
B. The battery runs out of energy after driving a short distance.
C. The battery is expensive and wears out after a few years.
D. It takes much time to recharge the battery.

35. What does the word "**environmentally-friendly**" in the passage mean?
A. sociable B. polluted C. green D. energetic

36. Which of the following is true according to the passage?
A. Hybrid cars are better than electric cars.
B. Electric cars are better than hybrid cars.
C. Electric cars and hybrid cars are better than traditional cars.
D. Electric cars and hybrid cars are worse than traditional cars.

LIVEWORKSHEETS

Four phrases/ sentences have been removed from the text below. For each question, mark A, B, C, or D on your answer sheet to indicate the correct option that best fits each of the numbered blanks from 37 to 40.

Australia

Australia is a country in the south Pacific Ocean, **(37)** _____. A "continent" is a very large piece of land. Australia is the world's sixth largest country and is nicknamed the world's largest island.
