

1. Read and write.

1. In this subject we learn about important events in the past.

2. You use instruments like guitars or drums when you study this subject.

3. We use this to search for the meaning of a new word when we study languages.

4. This tells us about where things are and how to get there.

5. You study about the climate, people, and different places of the world in this subject.

6. This subject is about numbers. We often do calculations while studying.

2. Write advices for those people below.

I'm John. I got lost. I can't remember how to get to Hoan My hospital.

He should

I'm Susan, I can't play sports well. I want to play football with my friends.

She should

She should

She shouldn't

I'm Jenny, I feel sad because I had a bad score in the final test. Yesterday I didn't review anything, I played game a lot.

I'm Michale, I feel really tired. I studied hard and didn't sleep last night for the exam because I want to be the best student in my school.

He should

He shouldn't

3. Write about your friend and a subject which your friend's good at. Give some advice to study well that subject with 'should' and 'shouldn't'.

This is my friend, Tom. Tom's really good at Maths, he likes to study Maths in school with his teacher and friends. Everyday Tom practice his Mathematic skills by counting objects in his house, doing basic calculations for his mother and playing games that can help him remember things that he learned in school. Sometimes Tom and I have a "Maths race", to see who can finish our homework faster. Tom loves Maths and he wants to be a Mathematician in the future. To be like Tom, you should create more homework for yourself to practice your Mathematic skills, be more active in class and ask more questions. You shouldn't forget your Math homework or ask someone to do it for you. Do you have any friends who are good students like Tom?
