   - Chocolate milkshake needs chocolate powder and smothies do not
   - Both Smoothies and chocolate milkshake can be served with ice cubes

Text 2 for question no 2 – 3

Pengembangan soal HOTS

Want to make your hydrating more fun? Try Cucumber Water! You may have seen it at spas or beauty salons, and the botanical flavour tastes like poolside relaxion in a sip. But how do you make this tasty infused water? Do you simply combine cucumber and water? Well, kind of. Here's what you need to know about how to make this tasty drink!

How to make cucumber water: basic steps

Cucumber water requires just cucumbers and water. But to make it, you do need one extra thing: time! It takes 1 hour for the flavor to infuse into the water.

Here are what to do

1. Slice ½ cucumber into thin
2. Add 8 cups cold
3. Refrigerate for 1 hour

Cheater tip: This infused water actually tastes pretty good after about 10 minutes. So if you're in a rush, you could serve immediately. Just use very cold water

In the TRUE/FALSE columns, type T if the statement is correct and F if it is wrong.
The following statements are the benefits that we get after reading the text above.

	Statements	TRUE	FALSE
a	We know how to make a cucumber drink.		
b	We get information about the nutrition in cucumbers.		
c	We understand the right way to consume cucumbers.		

2. The text is a recipe of a ....
   A. fermented beverage
   B. refresing drink
   C. cold dessert
   D. fruit juice

3. In the TRUE/FALSE columns, type T if the statement is correct and F if it is wrong.

   The following statements are the benefits that we get after reading the text above.

	Statements	TRUE	FALSE
A	We know how to make a cucumber drink.		
B	We get information about the nutrition in cucumbers.		
C	We understand the right way to consume cucumbers.		

Text 3 for question no 4 – 5

4. Which statements best describe the correct size of material in composting based on the poster? (You may give a tick (v) to more than one statement)

- [ ] To make 3 kg of compost, it takes 1 kg of dry leaves and twigs and 4 kg of organic waste.
- [ ] If we use 6 baskets of dead leaves, then we need to add 2 baskets of grass and green leaves.
- [ ] The ratio between brown material and green material used in the composting process is 3:2.
- [ ] To fill the 240L volume composting bin, we can put 180L of dry leaves and twigs with 60Lof fruit and vegetable scraps from our kitchen.

5. Match the step numbers in column A with the tools needed in column

A (steps)	B (tools needed)
1. Step 3	1. Garden scissors, sprayer
2. Step 4	2. Shovel, spading fork
	3. Watering can, hose
