

Title: Ocean Conservation and Marine Life

Level: 2nd BGU

Name:

Date:

PART 1: THE LECTURE (Reading)

The ocean covers more than 70% of our planet and is essential for all life. It provides us with food, oxygen, and helps regulate the climate. However, our oceans are under threat from pollution, overfishing, and coral reef destruction. By reducing plastic use, supporting marine protected areas, and making sustainable choices, we can help protect marine ecosystems and ensure a healthy ocean for future generations.

PART 2: MULTIPLE CHOICE (4 Questions)

1. What does 'Sustainability' generally refer to?
a) Living without technology. b) The coexistence of the biosphere and human civilization.
c) Only recycling plastic.
2. What is a 'Green Routine'?
a) Wearing green clothes every day. b) A set of habits to protect the planet.
c) Buying only expensive organic food.
3. Why should we use public transport according to the text?
a) To save money. b) To lower carbon emissions. c) Because it is faster than a car.
4. What is mentioned as a necessity for the future?
a) Renewable energy. b) Using more plastic. c) Traveling by plane.

PART 3: TRUE OR FALSE (3 Questions)

1. Solar and wind power are examples of renewable energy. (T / F)
2. Individual habits do not have any impact on the environment. (T / F)
3. Future generations will be affected if we don't take action now. (T / F)

PART 4: MATCHING (3 Questions)

- | | | |
|---------------------|-----|---|
| 1. Carbon Emissions | () | a. Power from natural sources like sun or wind. |
| 2. Renewable Energy | () | b. To convert waste into reusable material. |
| 3. Recycle | () | c. Greenhouse gases produced by human activity. |
