Inversions are used to add emphasis !!

but affirmative meaning!!!!!

The structure is:

negative or restrictive adverb + interrogative structure

Never had I been there before

the same sentence without emphasis = I had never been there before

You will hear six speakers, each using a sentence with **inversion**. Listen to each speaker twice and write down exactly what they say. The answer will be revealed after each speaker, so please **pause the recording** after the second listening to give yourself enough time to write.
