

1. Respon.

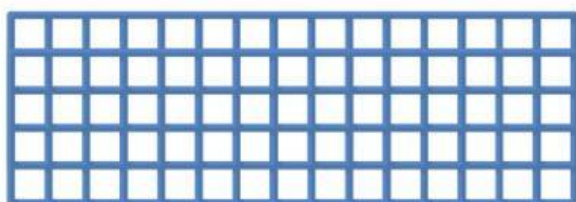

- Quantes **files** hi ha?
- Quantes **columnes** hi ha?
- Quants **quadrads** hi ha **en total**?
- Completa la multiplicació: $\times$ =

2. Quants quadrads hi ha en cada cas? Completa.

$$14 \times 5 = \dots\dots$$

	10	4
5		

$$15 \times 5 = \dots\dots$$

	10	5
5		

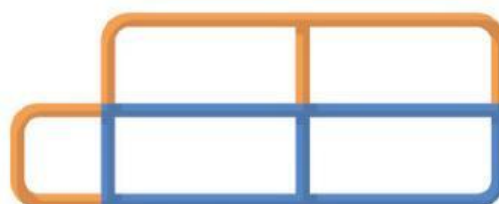

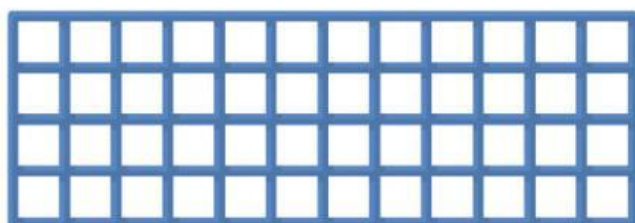

Data:

	20	2
6		

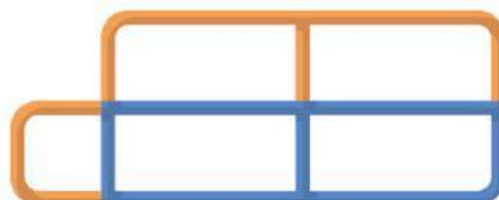

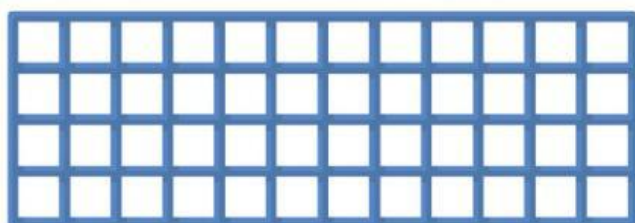

$$22 \times 6 = \dots\dots$$

3. Calcula la multiplicació 12×4 de 2 maneres diferents. Pinta el rectangle segons la descomposició que facis.

$$12 \times 4 = \dots\dots$$

$$12 = 10 + 2$$

$$12 \times 4 = \dots\dots$$

$$12 = \dots + \dots$$
