

WHAT IS IT MADE OF?

HOUSE

Come on, name the parts of the house and what can it be made of?

1 The chimeney is made of firebricks.

2 _____ 5 _____

3 _____ 6 _____

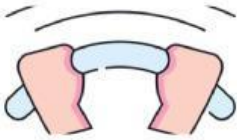

4 _____ 7 _____

Properties

Vocabulary

Label the illustration with the verb.

Break - Scratch - Stretch - Burn - Melt - Cut - Bend

Material Testing:

Make sentences about the materials with “can, but ... can’t ... easily”

1. (bend /Aluminium/oak wood) You can bend metal, but you cant bend Oak wood easily.
2. (melt/Polystyrene/Steel)
3. (scratch/Glass/Copper)
4. (stretch/Corck/Concrete)
- 5.(break/Glass/Concrete)
6. (cut/Timber/Stone)
7. (burn/Firebricks/Bamboo)

Speaking

Compare these materials. Where would you use them in house and why? using comparatives and superlatives

We use Aluminium in frames because Aluminium is more maleable than Oak wood.

We use Oakwood in frames because Oak wood is harder than Aluminium
