### The Tragic Tale of the Bali Tiger

- A. The Bali tiger, once a majestic inhabitant of the Indonesian island of Bali, is a stark reminder of the consequences of human actions on wildlife. This subspecies, known for its small size and beauty, sadly succumbed to extinction in the recent past.
- B. While estimates suggest there were around 20 Bali tigers in 1900, their numbers dwindled rapidly within just a few decades. The primary culprits behind this decline were humans. Fear and a misplaced sense of competition drove villagers to hunt these tigers. Tigers were seen as a threat to livestock, and some hunters even killed them for sport, boasting their skills amongst friends.
- C. Despite the last confirmed sighting occurring in 1937, a glimmer of hope emerged in 2009. A man claimed to have spotted a Bali tiger in the jungle, even capturing blurry photographs. This sparked speculation about the tiger's possible survival in remote areas. However, doubts clouded the report. The limited number of unclear photos and the lack of further evidence from the man himself raised questions.
- D. The question of whether a few Bali tigers might still exist remains unanswered. While the 2009 report offers a sliver of hope, the substantial challenges in verifying it make it difficult to be certain. The lack of clear documentation casts a shadow over the possibility of a surviving population.
- E. The story of the Bali tiger serves as a cautionary tale. Unchecked hunting and a lack of awareness regarding the importance of ecological balance led to the disappearance of a magnificent creature. Moving forward, conservation efforts must be prioritized to protect the remaining tiger species and prevent similar tragedies from occurring.

This was my first experience going to Karimunjawa. It was so fun. I was so excited several days before the trip. I went there with other winners from different schools. We had the holiday last month, from April 21<sup>st</sup> to April 22<sup>nd</sup>. We went there by ferry.

Karimunjawa is a group of islands located in north of Java, around 83 kilometers from Jepara. There are two options if you want to get there. The first one is using a ferry, which costs 81,000 rupiah. It takes 1 hour 45 minutes. The other option is using a car ferry, which is cheaper, only 72,000 rupiah. However, it takes longer to get there, around 6 hours. The committee provided us the first option because it took less time.

We departed from Jepara in the morning so we could spend more time in the afternoon exploring the islands. Once we got there, we were taken straight to the hotel where we had lunch.

The next thing to do was enjoying the sunset at Bukit Love Karimunjawa. It was amazing! As soon as the sky got darker, we went back to the hotel. We had dinner before we continued our activity. We explored the hotel premises. The next day, we did other activities. We went snorkeling after we finished our breakfast. We had a chance to have our pictures taken with beautiful fish and coral reefs there. I also spent time swimming with sharks. It was both exciting and thrilling.
