

My Parents

My parents are very important to me. They love me and help me. They always try to give me a good life. When I have a problem, they are always there for me. I feel happy to have kind and hardworking parents. They do many things to make our family happy.

My father is a good and kind man. He works hard every day to help our family. Even when he is tired, he does not complain. He teaches me to be polite and kind. He tells me stories from his life. I learn many good things from him.
