<b>Group Practice</b>					

**Geologists study rock and soil. This helps them to understand the Earth better.**

**In this activity, you will work like a geologist!**

**Materials:** Spade / spoon, paper plate, stick.

**Instructions:**

1. Work in groups.
2. Go outside around the school.
3. Use the spade / spoon to dig up some soil.
4. Put the soil on the paper plate.
5. Use the stick to spread the soil around.
6. Be careful, not to touch the soil with your fingers.
7. Write or draw what you see in the soil in the box below.

*Alhamdulillahirobbil 'Alamiin*
