

# Reading Comprehension Part 5 · Multiple Choice

Name: \_\_\_\_\_

**Instructions:** You are going to answer some questions about the text *"What's Wrong?"* by Knotion. For questions 1–10, choose the answer (A, B, C or D) which you think fits best according to the text.

|   |                                                                                                                                                                                            |                                                                                                                                                |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <b>What is the main purpose of the story?</b><br><b>A.</b> To teach readers how to organise a picnic.<br><b>C.</b> To describe what children like to eat for lunch.                        | <b>B.</b> To explain environmental problems through a conversation between friends.<br><b>D.</b> To show that storms are becoming less common. |
| 2 | <b>What had Lisa and Diego planned to do that day?</b><br><b>A.</b> Visit a friend's house.<br><b>C.</b> Eat outdoors together.                                                            | <b>B.</b> Cook a special meal at home.<br><b>D.</b> Go shopping for food.                                                                      |
| 3 | <b>What made the children change their plans?</b><br><b>A.</b> They forgot to prepare the food.<br><b>C.</b> The weather suddenly got bad.                                                 | <b>B.</b> Lisa's mother arrived unexpectedly.<br><b>D.</b> Diego didn't want to go outside.                                                    |
| 4 | <b>Why was Diego surprised by the rain?</b><br><b>A.</b> He didn't know it could rain so hard.<br><b>C.</b> The weather forecast had predicted sunshine.                                   | <b>B.</b> It was not the season when rain usually falls.<br><b>D.</b> He had never seen a storm before.                                        |
| 5 | <b>In the text, what does Lisa mean by "the greenhouse effect"?</b><br><b>A.</b> Growing plants inside a glass building.<br><b>C.</b> The way certain gases keep heat close to the Earth.  | <b>B.</b> A method used by farmers to protect their crops.<br><b>D.</b> A new type of energy produced by the Sun.                              |
| 6 | <b>According to Lisa, what is the main cause of rising temperatures?</b><br><b>A.</b> Changes in the position of the Sun.<br><b>C.</b> The burning of fuels such as gas and oil by humans. | <b>B.</b> Too many people living in cities.<br><b>D.</b> The natural cycle of the Earth's climate.                                             |
| 7 | <b>What does Lisa say about the effect of global warming on water?</b><br><b>A.</b> All places receive more rain equally.<br><b>C.</b> Rivers and lakes are growing larger everywhere.     | <b>B.</b> Some areas get wetter while others become drier.<br><b>D.</b> Water pollution is the biggest problem.                                |

|    |                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 8  | <p><b>What does Lisa suggest could happen to the Dead Sea?</b></p> <p>A. It could become the largest lake in the world.</p> <p>B. It could be used to produce energy.</p> <p>C. It could stop existing within a few decades.</p> <p>D. It could become a popular tourist destination.</p>                                                                                                                       |
| 9  | <p><b>Why does Lisa mention islands in the Pacific Ocean?</b></p> <p>A. To give an example of places threatened by rising sea levels.</p> <p>B. To suggest a good holiday destination.</p> <p>C. To explain where most greenhouse gases come from.</p> <p>D. To show that some countries are not affected by climate change.</p>                                                                                |
| 10 | <p><b>At the end of the story, what does Diego mean when he says "those other problems seem a little more difficult to solve"?</b></p> <p>A. He thinks finding a place to eat is always hard.</p> <p>B. He believes environmental issues are more complex than everyday problems.</p> <p>C. He is worried that they will not finish their sandwiches.</p> <p>D. He does not understand what Lisa explained.</p> |
