Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the following questions from 31 to 36.

Climate change is one of the most significant challenges facing our planet today. Rising temperatures, shifting weather patterns, and increasing levels of greenhouse gases are causing drastic changes in our environment. These changes lead to more frequent and severe natural disasters, such as hurricanes, floods, and droughts, affecting millions of people worldwide.

Governments and organisations are working to address climate change by implementing renewable energy solutions, such as solar and wind power, to reduce dependence on fossil fuels. Additionally, reforestation efforts are underway to absorb carbon dioxide from the atmosphere and restore natural habitats.

However, combating climate change requires collective action from individuals as well. People can contribute by reducing their carbon footprint through simple changes, such as using energy-efficient appliances, recycling, and supporting sustainable products. By making conscious choices, everyone can play a role in creating a healthier planet for future generations.

Question 31. What is the main idea of the reading passage?

A. Climate change is an insignificant issue.

B. Individuals have no role in fighting climate change.

C. Climate change is a major global challenge that requires action.

D. Renewable energy is the only solution to environmental problems.
