

1. Read the text and answer the following questions:

### Saving Water

Saving water is very important for people and planet. We should always save water because clean water is limited.

When we use too much water, we waste it and harm nature. We can all help by making small changes every day.

We should turn off the tap when we brush our teeth or when we do not need water. During a shower, we should try to use less water and not let it run for too long. When we wash dishes or clothes, we should use only the water we need. Every drop matters.

1. Why is saving water important?

- a) because water is limited.
- b) because water is dirty.
- c) because water is heavy.
