

Reading Exercise 1: Body Parts and Family Roles

Read the text

Maria is in the hospital with her father, Carlos. Carlos hurt his leg and arm in a car accident. He uses a crutch and a wheelchair to move around the hospital. Maria helps her father with his bandage and changes the dressing on his arm every morning. Carlos's wife, Elena, brings his inhaler because he has asthma. Their son, Diego, checks Carlos's blood sugar with a glucometer after lunch.

The nurse says Carlos also needs an oxygen tank at night to help him breathe better.

Activities

A. Label the body parts mentioned in the text

Write the correct body part.

1. Carlos hurt his _____.
2. Maria changes the dressing on his _____.
3. The oxygen tank helps Carlos breathe with his _____.

B. Identify the family roles

Write the relationship.

1. Maria is Carlos's _____.
2. Elena is Carlos's _____.
3. Diego is Carlos's _____.

C. Vocabulary Match

Match the medical item with its use.

Medical Item

1. Crutch
2. Oxygen tank
3. Glucometer

Use

- a. Helps a patient breathe
- b. Helps someone walk
- c. Measures blood sugar

Reading Exercise 2: Correcting Possessive Errors in Medical Texts

Read the text

Mr. Thompson is a patient in Room 12. The nurses checks Mr. Thompson bandage every four hours. His daughter brings the patient inhaler and his wife prepares the nebulizer treatment. The doctors review the patient medical records daily.

Mr. Thompson also receives medicine through a intravenous drip. His son carries the oxygen tank during transport.

Activities

A. Correct the possessive errors

Rewrite the sentences correctly.

1. The nurses checks Mr. Thompson bandage.
 2. His daughter brings the patient inhaler.
 3. The doctors review the patient medical records.
 4. Mr. Thompson receives medicine through a intravenous drip.
-

B. Vocabulary Practice

Choose the correct word.

1. A patient with breathing problems may use a:
 - a) syringe
 - b) nebulizer
 - c) crutch
 2. A patient who cannot walk may need a:
 - a) wheelchair
 - b) dressing
 - c) glucometer
-

Reading Exercise 3: Reading Medical Records and Ownership Reports

Medical Record

Patient Name: Sarah Lee

Age: 67

Condition: Diabetes and respiratory infection

Medical Equipment Report

- Sarah's **glucometer** is on the bedside table.
- Her son owns the portable **oxygen tank**.
- The hospital provides the **wheelchair**.
- Sarah uses an **inhaler** twice a day.
- The nurse changes her **dressing** every morning.
- Medication is given through an **intravenous drip**.

Family Information

- Her daughter, Anna, visits every evening.
 - Her husband, Robert, speaks with the doctor daily.
-

Activities

A. True or False

1. The hospital provides the wheelchair. _____
 2. Sarah uses a nebulizer twice a day. _____
 3. Anna is Sarah's daughter. _____
 4. The dressing is changed every evening. _____
-

B. Vocabulary Identification

Find these words in the text:

1. A device for breathing treatment: _____

2. A device for measuring blood sugar: _____
3. A mobility aid with wheels: _____

Reading Exercise 4: Reading Patient Descriptions and Medical Records

Read the patient description

James Walker is 54 years old. He injured his shoulder and foot at work. He arrives at the clinic using a crutch. The doctor cleans the wound and applies a bandage and a clean dressing.

James has a history of asthma, so he carries an inhaler and sometimes uses a nebulizer during severe attacks. Today, the nurse gives him medication with a syringe. Later, he receives fluids through an intravenous drip.

James's brother brings a wheelchair because James cannot walk long distances. His mother checks his medical records at the reception desk.

Activities

A. Complete the chart

Information	Answer
Patient name	_____
Age	_____
Injured body parts	_____
Family members mentioned	_____

B. Match the vocabulary

Word	Meaning
1. Syringe	a. Device for asthma treatment
2. Nebulizer	b. Tool for injections
3. Dressing	c. Protective wound covering
