

Listening Worksheet – Internet of Things (IoT)

Student's name: _____ Class: _____

Part A – Multiple Choice Questions. Watch the video and choose the correct answer (A, B, or C).

1. What is Internet of Things (IoT)?

- A) A network of connected everyday objects
- B) A type of computer program
- C) A social media platform

2. What is IoT in simple words?

- A) A new kind of laptop
- B) Things that can “talk” to each other using the internet
- C) A website for shopping

3. What are IoT examples?

- A) Smart homes, wearables, smart cities
- B) Only desktop computers
- C) Just mobile phones

4. What are the 4 types of IoT?

- A) Hardware, Software, Apps, Websites
- B) Consumer, Commercial, Industrial, Infrastructure
- C) Phones, TVs, Laptops, Tablets

5. What is an IoT device?

- A) A normal book
- B) A USB stick
- C) Any object with sensors and internet connection

6. Is Alexa an IoT?

- A) Yes, it connects and controls devices
- B) No, it is only a speaker
- C) Maybe, but only for music

7. **Where is IoT used in daily life?**
- A) Only in schools
 - B) Only in video games
 - C) Smart homes, healthcare, cities, agriculture
8. **Is a phone an IoT device?**
- A) Not exactly, it is more a controller
 - B) Yes, always
 - C) No, never
9. **Is a laptop an IoT device?**
- A) No, it is a traditional computer
 - B) Yes, it is IoT
 - C) Only if connected to Wi-Fi
10. **Is Smart TV an IoT device?**
- A) Yes, because it connects to the internet
 - B) No, it is only a screen
 - C) Sometimes, but only for movies
11. **Is Raspberry Pi an IoT device?**
- A) No, but it can be used to build IoT projects
 - B) Yes, it is an IoT device itself
 - C) It is only a toy
12. **What is difference between IT and IoT?**
- A) They are the same
 - B) IT is about managing information, IoT is about connected objects
 - C) IT is only about phones
13. **Difference between IoT and normal devices**
- A) IoT devices connect and share data, normal devices work alone
 - B) Normal devices are faster
 - C) IoT devices are only computers

14. Difference between IoT and computer devices

- A) IoT devices are everyday objects with sensors, computers are general-purpose machines
- B) IoT devices are laptops
- C) They are exactly the same
