8. The security guards prevented the protesters from _____ (enter) the main building.
9. He postponed _____ (submit) his application until he gathered all the required references.
10. I expect everyone _____ (arrive) at the conference hall before nine o'clock in the morning.

READING COMPREHENSION TEXT

Title: The Art of Critical Conversations in Modern Workspaces

In contemporary corporate environments, the ability to navigate complex interpersonal dynamics is highly valued. According to recent organizational studies, professionals spend more than thirty percent of their working hours engaged in negotiations or resolving delicate disputes. Misunderstandings frequently arise because individuals possess distinct communication styles and contrasting priorities. While some employees favor direct, assertive confrontations, others exhibit a preference for subtle, indirect diplomacy. When these approaches clash during critical project assessments, conflicts are almost inevitable.

Recently, a major technology firm implemented a conflict resolution seminar to address rising tensions within its international product development team. Prior to the intervention, several senior engineers reported experiencing

intense frustration during peer reviews. They claimed that their colleagues persistently refused to acknowledge design flaws, which consequently delayed software deployment. Conversely, the project managers asserted that the engineers lacked the necessary flexibility to make essential compromises when deadlines were fast approaching.

The workshop focused heavily on the strategic implementation of reporting verbs and comment adverbs to soften criticism and maintain professional decorum. Participants practiced rephrasing blunt statements. For instance, instead of stating, "Your data is entirely inaccurate," employees were encouraged to say, "Regrettably, the data appears to deviate from our initial projections." The results of this linguistic shift were remarkably positive. A follow-up survey revealed that ninety percent of the workforce felt more comfortable voicing dissenting opinions without the fear of triggering personal resentment. Ultimately, the study demonstrates that effective communication is not merely about technical accuracy; it requires a sophisticated understanding of emotional intelligence and verbal nuance.

PART 5: READING – TRUE / FALSE / DOES NOT SAY (10 Questions)

5 Instructions: Based on the text above, choose whether the statements are TRUE (T), FALSE (F), or DOES NOT SAY (DS).

1. Professionals spend more than half of their working hours resolving delicate disputes.
2. Misunderstandings in the workplace are often caused by different communication styles.
3. The technology company hired an external consultant from London to run the seminar.
4. Senior engineers were frustrated because their colleagues ignored design flaws.
5. Project managers believed that engineers were too flexible with deadlines.
6. The seminar taught employees how to use comment adverbs to make criticism less aggressive.
7. The phrase "Your data is entirely inaccurate" was recommended by the workshop instructors.
8. Every single employee participated in the follow-up survey after the seminar concluded.
9. Ninety percent of the workforce felt better about expressing disagreement after the training.
10. The study concludes that technical accuracy is the only important factor in professional success.

PART 6: READING – MULTIPLE CHOICE QUESTIONS (10 Questions)

6. Instructions: Select the best option according to the information provided in the text.

1. What is the main objective of the text?
 - A) To criticize the management style of modern technology firms.
 - B) To analyze the impact of language and communication training in resolving workplace conflicts.
 - C) To prove that engineers are better communicators than project managers.
 - D) To promote a specific conflict resolution seminar available on the market.

2. What percentage of working hours do professionals spend on negotiations and disputes?

- A) Exactly thirteen percent.
- B) Less than twenty percent.
- C) More than thirty percent.
- D) More than fifty percent.

3. Why do conflicts occur according to the first paragraph?

- A) Because employees do not receive adequate salaries.
- B) Because individuals have different priorities and communication styles.
- C) Because the technology systems are outdated.
- D) Because managers refuse to speak directly to staff.

4. Which group of professionals complained about delays in software deployment?

- A) The project managers.
- B) The senior engineers.
- C) The external consultants.
- D) The human resources department.

5. What did project managers assert about the engineers?

- A) They asserted that engineers worked too many overtime hours.
- B) They asserted that engineers did not possess enough flexibility to compromise.
- C) They asserted that engineers were planning to leave the firm.
- D) They asserted that engineers had excellent diplomatic skills.

6. The workshop taught participants how to use language to:

- A) Hide financial mistakes from the public.
- B) Soften criticism and maintain professional decorum.
- C) Conclude meetings much faster than usual.
- D) Force colleagues to accept unfair terms.

7. How did the text exemplify a softened statement?

- A) By demanding immediate corrections to the database.
- B) By using the adverb "regrettably" and changing the verb structure.
- C) By ignoring the error completely during the review.
- D) By sending an anonymous email of complaint.

8. What did the follow-up survey reveal about ninety percent of the workforce?

- A) They wanted to receive a higher promotion.
- B) They felt more comfortable expressing dissenting opinions.
- C) They wished to change their current department.
- D) They decided to avoid all future peer reviews.

9. The word "nuance" in the final paragraph closest in meaning to:

- A) Loudness
- B) Subtle difference
- C) Total absence
- D) Rigidity

10. What does the text suggest about effective communication?

- A) It depends solely on memorizing technical terms.
- B) It requires emotional intelligence and verbal sophistication.
- C) It is impossible to achieve in large technology companies.
- D) It is only necessary for high-level directors and executives.
