4 Read the text. Then read the sentences and write *true* or *false*.

Art from rubbish

People all over the world have started to make things from recycled rubbish. Many artists have made sculptures, statues or other works of art out of recycled materials such as plastic bottles and bags. Other artists have used pieces of recycled metal to build sculptures like a huge fish.

Useful things are also produced from recycled rubbish, things that are functional. Items of furniture for the house are made from recycled metal, wood or cardboard. How about a chair which is made from metal tubes? It may not be very comfortable, but it's very green.

Clothing is also made from recycled materials. In some countries, T-shirts are produced from recycled plastic bottles. Some fashion designers have also designed dresses made of plastic bags. Look at the glamorous example below!

- Artists have only used plastic to make works of art. false
- Recycled metal is used to make sculptures. _____
- Nothing useful is produced from recycled materials. _____
- Interesting items of furniture are produced from recycled metal. _____
- Recycled plastic bottles are used to make T-shirts _____
- There is a dress made of plastic bottle tops. _____
