## TIPS ON HOW TO AVOID CAKEY MAKEUP

The best way to avoid cakey makeup is to prevent it from happening in the first place. Here are a few tips to help you achieve a flawless, natural-looking makeup application every time:

### **Tip 1: Prep Your Skin**

Start with a clean, moisturized face. Consider using a makeup primer to create a smooth, even base for your makeup.

### **Tip 2: Use the Right Products**

Avoid heavy foundations and concealers, as these can be more likely to cake. Choose lightweight, oil-free makeup products that are appropriate for your skin type. For overall light makeup application, check out products like BB creams or skin tints.

### **Tip 3: Use the Right Tools**

Use fluffy, tapered brushes or damp makeup sponges to apply your makeup, as these will help you avoid over-application and create a more natural look.

### **Tip 4: Finish the Look**

With Setting Spray Always finish your makeup application with a setting spray. A setting spray locks makeup in place, helping to prevent shifting, transfer, and caking.

By following these tips, you can avoid cakey makeup and achieve a flawless, natural-looking makeup application every time. Remember, practice makes perfect, so don't be discouraged if you don't get it right the first time. With a little practice, you'll be a cake-free pro in no time!
