Soil Horizons

ScienceFacts.net

Next to each soil horizon, write the letter that matches the description below. Then, color the horizons.

C - Devoid of any organic matter and is made of broken-up bedrock, making it hard

O - The uppermost layer of the soil, rich in organic matter

E - Consists of nutrients leached from O and A horizons

A - Also known as the topsoil, it has a dark brown color as it contains the maximum organic matter

R - Consists of un-weathered igneous, sedimentary, and metamorphic rocks.

B - Has less organic content but is rich in minerals that are leached down from the topsoil
