

## Save Our Earth

Every day, we can do simple things to help our planet.  
We should turn off the water when brushing our teeth.  
We can plant trees to make the air clean and fresh.  
People can reuse bags and bottles instead of throwing them away.  
Walking or riding a bike helps reduce pollution.  
Keeping parks and beaches clean protects animals and nature.  
When everyone helps, the Earth becomes a better place to live.

1. What should we turn off when brushing our teeth?

- A. The lights
- B. The water
- C. The television
