

COLEGIO EPISCOPAL LA ANUNCIACIÓN

Name: _____

Grade: _____

Date: _____

Topic: *Underwater Mysteries*

Teacher: _____

I. Match the words to their definition

- | | |
|---------------|---|
| a. Look for | ☐ An organized journey for a particular purpose |
| b. Land | ☐ An accident where a boat is destroyed or sunk at sea. |
| c. Transmit | ☐ A very large area of sea. |
| d. Expedition | ☐ To try to do something. |
| e. Explorer | ☐ Someone who travels to places to discover things. |
| f. Ocean | ☐ Attempt to find someone or something. |
| g. Shipwreck | ☐ To arrive on the ground or other surface.(plane) |
| h. attempt | ☐ Send electrical signals using a computer network, radio or TV. |

II. Read and match the picture with correct word: Write the word below the image

shipwreck

Scuba diver

ROV's

ship

archeologist

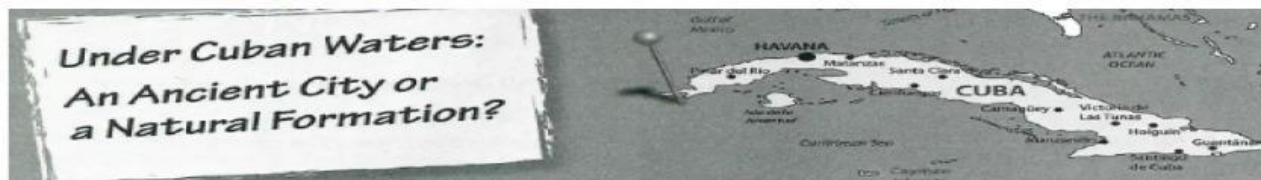

1.	2.	3.	4.	5.
----	----	----	----	----

III- Complete the sentence with **use to** / **used to**. Circle the correct answer

- Did it **use to** / **used to** take a long time to get ready for an underwater expedition?
- The crew **used to** / **use to** start each day with a list of things to do.
- Each explorer **use to** / **used to** be responsible for certain items on the list.
- The first thing they **use to** / **would** do was to check that everything was in place.
- If they were missing something, they **would** / **use to** quickly look for what they needed.
- When did they **use to** / **used to** get together and wish each other luck?

IV- Read. Choose **True** or **False**

In 2001, underwater explorers found something interesting. Off the western coast of Cuba, they discovered huge stone structures on the ocean floor. At first, they thought the structures were man-made carvings. Was it an ancient city from thousands of years ago? They weren't sure.

The explorers wanted to examine the structures more carefully. They sent a robot 600 metres (2,000 feet) down to take pictures and film the site.

They found out that the site included smooth blocks with right angles, pyramid shapes, and some circular shapes. Some experts believe that the formations are more than 6,000 years old. That's older than the pyramids in Egypt! Paulina Zelitsky is the main explorer who found the structures. She says, 'It's a really wonderful structure which really looks like it could have been a large urban centre.'

Other researchers, however, aren't so sure. Some say the structures are too deep. They ask, 'How did they get there?' They suggest that, over centuries, nature carved the shapes. Cuban marine geologist Manuel Iturralde says that nature can create some really wonderful formations.

Manuel has studied many underwater structures and formations in his career. Still, he cannot accurately identify the formations as natural. He agrees that they are very unusual, and he would have difficulty explaining how they formed naturally.

So, what are these structures under Cuban waters? Are they the remains of an ancient city? Or, are they natural formations? We may never know for sure..

A. Manuel believes that the site contains the remains of a city..	☐ True	☐ False
B. A special robot took photos and filmed the site.	☐ True	☐ False
C. Some experts believe that the formation is 5,000 years old..	☐ True	☐ False
D. We are not sure whether the site is natural or man made.	☐ True	☐ False

V. Match the words to their definition.

find out

make sure

preparation

transmit

- _____ 1. the act of getting ready
- _____ 2. send a signal
- _____ 3. learn something
- _____ 4. check or confirm something
