Listen to the recording TWICE and fill in each gap with NO MORE THAN TWO WORDS AND/OR A NUMBER.

I'm going to talk to you today about (1)..... All the inventions are in the field of flying... First, I'm going to talk about different methods of flying. After that, I'll tell you when each (2)was invented and who invented it. Finally, I'm going to say which invention was the most (3), in my opinion.

OK. So, first, what are the main methods of flying that we use today? There is the plane itself, then the jet plane, which is much faster. For transporting large numbers of people, there is the (4).....

The jumbo jet can carry more than 500 people. A very different kind of flying machine is the (5)..... It can go straight up and straight down. It can even stay in one place. Finally, there is the rocket, which takes astronauts into space. And of course, the Space Shuttle, which takes them up into space and brings them back.

OK. So, there are several methods of flying. But when was each method invented? And who invented it? The Wright brothers flew the first plane with an engine in (6)..... The plane had two propellers - pieces of wood which turn to pull the plane through the air. For nearly (7)years the propeller plane was the only type, but in 1930, Whittle - spelt W-H-I-T-T-L-E-invented the jet engine. Jet means a very fast stream of something in this case, air. Jet planes can go much faster than propeller planes. In 1970, the American (8)company, Boeing - that's B-O-E-I-N-G- invented the jumbo jet. Jumbo means 'very big'.

Sixty years earlier, in around 1910, Sikorsky started work on a helicopter but it did not fly until 1939. So the next development was in 1926. Robert Goddard invented the rocket but it was not until 1961 that Russian scientists sent a man into space on a rocket. Finally, in (9)....., NASA, which is the American Space Administration, invented a plane which could go into space and return to Earth. They called it the Space Shuttle because a shuttle is something which goes to a place and comes back. On April 12, 1981, the first Space Shuttle took off from Florida in the United States.

So we have heard about the main inventions in the field of flying. But which invention was the most important? In my opinion, it was the last invention, the (10)..... This invention has helped us to reach out into space. From space we see the world as it really is a small ball, which we must look after.
