

## HOW DOES WATER GET TO OUR HOUSES?

1. What's the word? Write the words under the pictures.

sink lake	faucet river	bathtub well	pipes soil	ocean rock
				
				

2. Watch the video "How does water get to our houses". Click on the link to watch the video.

How Does Water Get to Your House?

**3. After watching the video, put the sentences in order.**

	A well is a hole that reaches down, deep into the Earth.
	They clean the water and then they send it through pipes to everyone.
	The well starts to fill with water.
	The water gets into the ground when it rains.
<b>1</b>	Some cities and towns get their water from sources like lakes and rivers.
	It's like the heavy dirt is squeezing the water into the well.
	To build a well, you dig a long tube into the ground until it reaches the water.
	Once the water is in the well, we can use pipes to pull it out.
