### 3. Read the text about penguins. Then do the tasks below.

Penguins are very interesting birds. They live in cold places, especially in Antarctica. Penguins cannot fly, but they are excellent swimmers. There are many kinds of penguins. The Little Blue Penguin is the smallest penguin in the world. The Emperor Penguin is the tallest and one of the largest penguins. Penguins live in groups and help each other stay warm. Baby penguins are called chicks. In a penguin family, the youngest chicks stay close to their parents for protection. Many people think penguins are the prettiest birds because of their black-and-white feathers. Penguins spend a lot of time in the water looking for fish. They are some of the best swimmers in the animal world. Today, some penguins are in danger because of climate change and pollution. People are working hard to protect them.
