Resources

- 25 Article on invasive lionfish
- 26 Documentary on microplastics
- 27 Podcast on ocean pollution
- 28 Book on coastal ecosystems
- 29 Article on metal toxicity
- 30 Podcast on floating marine cities

PART 4 Questions 31–40

Complete the notes below.

Write **ONE WORD ONLY** for each answer.

Sources of rubber

Three resources which are essential for industrial civilisation

- 31
- fossil fuels
- rubber

Natural rubber

This mainly comes from the Pará rubber tree, now cultivated in South-East Asia.
The supply is limited because

- the growth of the tree is 32
- production cannot easily be adjusted because of increasing or decreasing 33
- the tree only grows near the 34
- extracting the latex (rubber) is labour-intensive
- it is very difficult to 35 rubber after production.

New threats include

- lack of genetic diversity, leading to danger of disease caused by a 36
- a shift to the cultivation of palm oil
- extreme 37 events.

Synthetic rubber

- may be used for engine parts and cooking utensils
- is less 38 than natural rubber
- is unsuitable for many purposes e.g. the tyres of aircraft.

An alternative source of natural rubber

- A wild flower (a type of dandelion) has rubber in its 39
- It can be grown in many locations and does not require good 40
