Mark the letter A, B, C or D on your answer sheet to indicate the best arrangement of utterances or sentences to make a meaningful exchange or text in each of the following questions from 13 to 17.

Question 13 [699832]:

- Debbie: Hi, Penny. How are you doing? Have you just been to the gym?
- Debbie: Yes, good. I'm planning on going to the gym later, but it's hard finding the time now I've got a child!
- Penny: Hi, Debbie. I'm good, thanks. Yes, I've just finished a workout. How are you?

A. b - c - a B. a - c - b C. b - a - c D. c - a - b

Question 14 [699833]:

- a. JOHN: Well, I decided to make a dishwasher that uses carbon dioxide.
- b. PROFESSOR: Sounds like a brilliant idea! Your system will totally do away with the need for strong detergents. So what happens once the dishes are clean?
- c. PROFESSOR: In place of water and detergent? How will you manage that?
- d. JOHN: Well, to allow them to dry, the liquid carbon dioxide and the waste materials all go to an area called the holding chamber. That's where the liquid is depressurized and so it reverts to a gas. Then the oil and grease are separated out and sent to the waste system.
- e. JOHN: The idea is to pressurize the carbon dioxide so that it becomes a liquid. The fluid is then released into the dishwasher where it cleans the dishes all by itself

Question 17 [699836]:

a. It has been estimated that an additional one-fourth of the Earth's land surface is threatened by this process.

b. The expansion of desert-like conditions into areas where they did not previously exist is called desertification.

c. Desertification is accomplished primarily through the loss of stabilizing natural vegetation and the subsequent

accelerated erosion of the soil by wind and water.

d. The deserts, which already occupy approximately a fourth of the Earth's land surface, have in recent decades been increasing at an alarming pace.

e. In some cases the loose soil is blown completely away, leaving a stony surface; in other cases, the finer particles may be removed, while the sand-sized particles are accumulated to form mobile hills or ridges of sand.

A. c - a - b - d - e

B. d - a - b - e - c

C. d - b - a - c - e

D. e - d - b - a - c
