

M3 REVISION TEST (MIDTERM)

I. Matching Type: Match column A with column B.

Column A

- ___ 1. Large region of the Earth with specific types of plants, animals, and climate patterns.
- ___ 2. Animals in Deciduous forest do this during winter.
- ___ 3. Factors that affect climate conditions.
- ___ 4. This is what happens to the leaves of trees in Deciduous forest during autumn.
- ___ 5. Two major types of Biomes
- ___ 6. The main difference between freshwater and marine biome.
- ___ 7. A biome that receives the most amount of precipitation in a year.
- ___ 8. The largest ocean on Earth.
- ___ 9. The only Biome with four seasons.
- ___ 10. Trees that grow needles instead of leaves and cones instead of flowers.
- ___ 11. Coldest Biome.
- ___ 12. Home to wildflowers and grasses.
- ___ 13. Receives very little rain in a year which makes it the driest Biome.
- ___ 14. The type of trees that covers Taiga.
- ___ 15. An example of marine (saltwater) Biome.

Column B

- A. Deciduous Forest
- B. Biome
- C. Tropical Rainforest
- D. Desert
- E. Tundra
- F. Grassland
- G. Terrestrial and Aquatic
- H. Conifers
- I. Salt level
- J. Hibernate
- K. Ocean
- L. Precipitation and temperature
- M. Pacific
- N. Lose their leaves
- O. Evergreens (conifers)

II. True/False

- ___ 1. Fish that naturally live in the freshwater biome can thrive in marine (saltwater) biome.
- ___ 2. Organisms in freshwater biome need oxygen and food to survive.
- ___ 3. Alligators, frogs, and most aquatic snakes will be found in freshwater biome.
- ___ 4. Climate change, pollution, and overfishing are threats to marine ecosystem.
- ___ 5. Octopus, squid, and dolphins are freshwater organisms.

III. Identify the Biome in which the following organisms naturally live.

CHOICES:

Tropical Rainforest
Grassland
Tundra

Deciduous Forest
Desert
Taiga

- ___ Polar Bear
- ___ Cherry Blossom
- ___ Monkey
- ___ Cactus
- ___ Conifers

- ___ Maple
- ___ Giraffe
- ___ Palms
- ___ Camel
- ___ Elephant
