BIMONTHLY ASSESSMENT - II

FULL NAME: ..... GRADE/SECTION: 5th .....

I. Listen and complete the dialog about social media.

About two hours. I try not to use my phone too much.
Bye, Emma! Have a nice day!
Hi, Emma! Yes, I do.
I completely agree. Let's be responsible digital citizens!
I like chatting with my friends and watching videos.
I think it helps us communicate with people and learn new things.
I use the internet to do my homework and learn English.
Yes. Cyberbullying, fake news, and spending too much time online.

II. Listen and complete the dialog about the environment.

Great idea! We **should**, **must**, and **have to** take care of the Earth.
I agree. Trees help reduce air pollution.
Recycling helps reduce waste and keeps our city clean.
We **should** save water and electricity every day.
Hi Emma! Yes, I have. The air very polluted.
Yes! Small actions can make a big difference.
Yes. Water pollution is dangerous for animals and people.
You're right. Deforestation is a serious problem.

III. Read the text

PROTECTING OUR PLANET

Our planet is facing many environmental problems today. Air pollution, water pollution, deforestation, and climate change are affecting people, animals, and plants all over the world.

Air pollution is mainly caused by factories, cars, and burning fossil fuels. It makes the air dirty and can cause serious health problems. Water pollution happens when garbage, chemicals, and plastic waste enter rivers, lakes, and oceans. As a result, many fish and other animals lose their habitats.

Climate change is another major problem. The Earth's temperature is increasing because of greenhouse gases. This causes extreme weather such as floods, droughts, heat waves, and stronger storms. Many endangered animals are also losing their homes because forests are disappearing.

Everyone can help protect the environment. We should recycle paper, plastic, and glass. We should also save water and electricity, plant more trees, and use public transportation or bicycles whenever possible. Governments, schools, and families must work together to reduce pollution and protect nature for future generations.

If we all take small actions every day, we can make a big difference and create a healthier planet for everyone.

I. True, False or No Information

1. Air pollution is caused only by factories.
2. Plastic waste can pollute rivers and oceans.
3. Climate change causes stronger storms.
4. The reading says that recycling is unnecessary.
5. Everyone can help protect the environment.
6. Governments must work alone to reduce pollution.
7. The passage says that bicycles can reduce pollution.
8. The text mentions the exact number of endangered species.
9. Forests are disappearing because of deforestation.
10. The author believes that small actions can make a difference.

II. Answer correctly.

1. Is air pollution harmful to people's health?
2. Does water pollution affect animals?
3. Should we recycle paper, plastic, and glass?
4. Must governments, schools, and families work together?
5. Can planting trees help the environment?

III. Select the correct Answer.

1. What environmental problems are mentioned in the reading?

_____

2. Why is climate change dangerous?

_____

3. Where does water pollution happen?

_____

4. Who should work together to protect the environment?

_____

5. How can people help reduce pollution?

_____

LIVEWORKSHEETS

IV. Match the words with their meanings

1. Air pollution	a. Animals in danger of disappearing
2. Deforestation	b. Dirty air caused by harmful gases
3. Recycle	c. Cutting down many trees
4. Endangered animals	d. Using materials again
5. Climate change	e. Long-term changes in Earth's weather

Complete the sentences

1. We should plant more _____.
2. Air _____ affects our health.
3. We should _____ paper, plastic, and glass.
4. _____ change causes extreme weather.
5. Saving _____ is important for our future.

Climate
Pollution
Recycle
Tres
water

IV. Unscramble the words and write correctly

1. should / do / What / we / pollution / ? / reduce / to /
2. ? / must / paper / Why / plastic / and / recycle / people /
3. we / stop / can / help / ? / How / change / climate /
4. to / garbage / have / throw / do / we / Where / ? /
5. must / the / Who / protect / ? / environment /
