Narrative Text

The Story of A Friendly Future

 Name : _____

 Class : _____

 Date : _____

Learning Objectives

☒ Identify the generic structure of a narrative text.

☒ Identify the language features.

☒ Understand the moral value of the story.

Read the Text

The Story of A Friendly Future

In 2050, a young inventor named Aria created smart robots to help people protect nature. The robots planted trees, cleaned rivers, recycled waste, and helped farmers grow healthy crops. At first, many people were afraid because they thought robots would replace human jobs.

One year, a long dry season caused many farms to fail. Aria asked the robots to work together with the farmers. They collected rainwater, made natural fertilizer, and planted thousands of new trees.

Finally, the city became green again. The rivers were clean, animals returned, and people realized that technology could protect the Earth when it was used wisely. Since then, many cities have followed Aria's idea and built a friendly future for everyone.

 B. Reading Comprehension

Choose the best answer!

1. Who created the smart robots?

- ☐ A. Tom
- ☐ B. Aria
- ☐ C. Jack
- ☐ D. David

2. Why were people afraid of the robots?

- ☐ A. They polluted the city.
- ☐ B. They would replace human jobs.
- ☐ C. They destroyed forests.
- ☐ D. They were dangerous.

3. What did the robots do?

- ☐ A. Cut down trees.
- ☐ B. Helped protect nature.
- ☐ C. Built schools.
- ☐ D. Made cars.

4. What happened after the dry season?

- ☐ A. The farms produced more food.
- ☐ B. The robots stopped working.
- ☐ C. Many farms failed.
- ☐ D. Nothing changed.

5. What is the moral value?

- ☐ A. Technology should replace humans.
- ☐ B. Technology should be used wisely.
- ☐ C. Nature is not important.
- ☐ D. Robots are dangerous.

Essay

1. Why did people change their opinion about the robots?
2. What lesson did you learn from the story?
3. How can you protect the environment in your daily life?
