C. SCIENCE PROCESS SKILLS

Match the description of the science process skill or ability to its name. Draw a line to connect them.

1

I sort or group things based on their similarities and differences.

2

I think what might happen in the future based on what I know.

3

I use my senses to gather information using my eyes, ears, nose, tongue, or skin.

4

I use clues from what I observe to find the answer.

5

I use tools to find out how big, how many, how heavy, or how much.
