SHOULD OR SHOULDN'T?
SPACE EDITION

Fill in the blanks with "should" or "shouldn't".

1. Astronauts _____ wear their spacesuits when they leave the spacecraft.
2. Before a space mission, astronauts _____ exercise regularly to keep their muscles and bones strong.
3. Astronauts _____ forget to check their oxygen supply before beginning a spacewalk. It could put their lives at risk.
4. If an astronaut feels sick during a mission, they _____ inform the medical team immediately.
5. Astronauts _____ open the spacecraft's door without checking the pressure first, as this could be extremely dangerous.
6. Scientists believe future astronauts _____ grow vegetables in space to help provide fresh food during long missions.
7. During a spacewalk, astronauts _____ move too quickly because they could lose control of their position.
8. Astronauts _____ learn how to use emergency equipment before travelling into space.
9. Space travellers _____ drink too much water at once because liquids behave differently in microgravity.
10. Astronauts _____ follow the mission schedule carefully because every activity has to be planned in advance.
