Many years ago, people made pictures on a wall by letting the sun into a dark room through a tiny hole – they called this room a camera obscura. Before 1825 there were no photographs, but in 1829 Louis Daguerre invented the first camera. Then, in 1888, George Eastman invented the Kodak camera. After that, Steven Sasson invented the first digital camera in 1975. Now most people have a camera on their smartphone. We can all take photos.
