FIRST QUIZ – 7TH CYCLE

1 Complete with the, – (no article), an or a.

Exploring the Nazca Lines

(1) ____ Nazca Lines are (2) ____ ancient geoglyphs located in (3) ____ Nazca Desert in southern Peru. They were created by (4) ____ Nazca culture, which flourished between 100 BC and AD 800. (5) ____ lines depict various animals, such as (6) ____ hummingbird, (7) ____ spider, and (8) ____ monkey, as well as geometric shapes and human-like figures. (9) ____ purpose of these enormous drawings remains (10) ____ mystery to this day.

Some theories suggest that (11) ____ lines had (12) ____ astronomical or calendrical function, perhaps marking (13) ____ solstices or equinoxes. Other researchers believe they were part of (14) ____ religious rituals, possibly acting as paths for processions or messages to (15) ____ gods. (16) ____ sheer size of (17) ____ drawings, some stretching for hundreds of meters, means they can only be fully appreciated from (18) ____ air. This has led to (19) ____ speculation about how they were designed and created by (20) ____ ancient people without modern technology.

8. You can _____ (OGLEGO) the name of the restaurant to find out the address.
9. They're going to _____ (POLUDA) their vacation pictures tonight.

7. Reading

The story behind the World Wide Web

To find out when the World Wide Web began, we first need to look at the Internet. The origins of the Internet go back to the space race of the 1950s. After the Russians sent the satellite Sputnik into space, Americans wanted to develop their own technology further, so they set up ARPA – the Advanced Research Projects Agency. This agency found a way of connecting computers, which they called ARPANET. In 1974, they changed its name to the internetwork or Internet for short.

In 1980, a scientist at CERN, the European Organization for Nuclear Research, wrote a computer program so that he and his colleagues could share their research. The scientist's name was Tim Berners-Lee, and his software was called ENQUIRE. At first, only scientists at CERN could use the program, which contained a new computer language called hypertext. Then, in 1991, he and a colleague wrote a more advanced version of the program which made hypertext available over the Internet. This was the beginning of the World Wide Web, as we know it. The first website and web server was info.cern.ch. Today, there are more than 227 million websites containing over 65 billion web pages.

Over two billion people now use the Internet, which is nearly a third of the world's population.

Read the article again and number the events in the order they happened.

a) ____ Tim Berners-Lee developed a new computer language.

b) ____ Americans opened an agency to develop new technology.

LIVEWORKSHEETS

c) ____ They put the new language on the Internet.

d) _1__ The Russians sent a satellite into space.

e) ____ The World Wide Web made the Internet available to all computer users.

f) ____ The network changed its name to the Internet.

g) ____ The agency developed a network to connect computers.

h) ____ Berners-Lee and a colleague used the new language to write a new program.

LISTENING

8. **Listen to four speakers talking about how they use the Internet. Match speakers 1–4 to the thing they do most often.**

Speaker 1 __ a) uses a social network.

Speaker 2 __ b) plays games.

Speaker 3 __ c) does a job.

Speaker 4 __ d) talks to family and friends.

9. **Listen again and match the speakers to the sentences A–D.**

Speaker 1 ___

Speaker 2 ___

Speaker 3 ___

Speaker 4 ___

A This person often puts photos on the Internet.
B This person likes his / her job.
C This person uses the Internet to relax.
D This person saves money because of the Internet.
