The future of a social giant

TikTok is a popular social media app where users create and share short videos, usually with music.

TikTok started in 2016, made by a Chinese company called ByteDance. TikTok quickly became well-known around the world, especially among young people. The app lets users make videos that last from 15 seconds to 3 minutes. These videos can show many different things, like dance challenges, lip-syncing, comedy sketches, educational content, and more.

One of TikTok's main features is the 'For You' page. This page uses smart technology to suggest videos based on what a user likes and watches on the app. This personalized feed helps users find new videos and creators that match their tastes, making the app very enjoyable. TikTok also offers many tools, filters, and effects that make it easy for users to create fun and professional-looking videos, even if they don't have much experience.

TikTok has had a big effect on global culture, shaping trends in music, fashion, beauty, and even language. Songs that become popular on TikTok often rise on the music charts, and fashion or beauty trends that start on the app can quickly spread around the world. Many creators have become famous through TikTok, turning their online popularity into careers as influencers, musicians, or actors.

The platform has also become an important tool for marketing. Brands use TikTok to reach large, often younger audiences through ads, branded hashtags, and partnerships with influencers. These marketing strategies work well because TikTok's format encourages creative and real content that connects with users.

Even though TikTok is very popular, it has faced some problems, especially with how it protects user data and privacy. Some governments have raised questions about how TikTok manages user information, leading to talks about rules or restrictions. However, the app continues to grow, adding new features and attracting more users.

In summary, TikTok is more than just a social media app; it's a cultural force that continues to shape how people create and enjoy content worldwide. Its influence is likely to last, making it a key player in the digital world for years to come.

- 1 The purpose of the first paragraph is to ...
 - A ☐ persuade the reader to download TikTok.
 - B ☐ introduce some basic facts about TikTok.
 - C ☐ look at the history of TikTok.
- 2 The writer mentions the 'For You' page to explain ...
