

[BÀI 3] OPEN CLOZE: A SCHOOL PROJECT

For each question (27–32), write **ONE** word for each gap.

A School Project

Last month, our science teacher told us about a project to help protect the environment. We had to work (27) _____ groups and think of ways to save energy at school.

Before we started the project, our teacher (28) _____ already explained what we needed to do. She also showed us some interesting inventions that other students had created.

My group decided to design a simple machine that could use sunlight to produce power. We knew that the machine would not be ready immediately, so we worked on it every afternoon.

This time next week, we (29) _____ be presenting our project to the other students. We hope they will like our idea.

Our teacher said that we (30) _____ use recycled materials whenever possible. She also told us that we didn't (31) _____ to spend much money on the project.

If our machine works well, the school (32) _____ use our idea in the future.
