

MATH WORKSHEET

Type 2 – Find x

Small steps – Big progress! ♥

Name: _____ Class: _____

Instruction: Write the correct number in each box. ♥

a)

$$0,75x + 0,25x = 2$$

$$(\square + \square) x = 2$$

$$\square x = 2$$

$$x = 2 \div \square$$

$$x = \square$$

$$\text{So, } x = \square$$

Keep going! ♥

b)

$$\frac{x - 1}{2} = \frac{4}{5}$$

$$\frac{\square \cdot (x - 1)}{10} = \frac{8}{\square}$$

$$5x - \square = 8$$

$$5x = \square + \square$$

$$x = \square : \square$$

$$x = \square$$

$$\text{So, } x = \square$$

Think
Try
Solve
Grow
😊

c)

$$(x - 1,5)(2x + 1) = 0.$$

Case 1

$$x - 1,5 = \square$$

$$x = \square + \square$$

$$x = \square$$

Case 2

$$2x + 1 = \square$$

$$2x = \square - \square$$

$$x = \square \div \square$$

$$x = \square$$

$$\text{So, } x = \{ \square ; \square \}.$$

You can do it! 😊

Believe in yourself! ♥
