

APRENDAMOS A DIVIDIR

DIVIDAMOS

Ya aprendimos las
tablas de la división...:
ahora a **DIVIDIR**!

RESUELVE

usando la tabla de multiplicación.

$16 \div 2 = 8$ usamos la tabla del 2: $2 \times 8 = 16$

$9 \div 3 = \square$

$\square \times 3 = 9$

$12 \div 6 = \square$

$\square \times 6 = 12$

$64 \div 8 = \square$

$\square \times 8 = 64$

$24 \div 6 = \square$

$\square \times 6 = 24$

$42 \div 7 = \square$

$\square \times 7 = 42$

$30 \div 5 = \square$

$\square \times 5 = 30$

$36 \div 4 = \square$

$\square \times 4 = 36$

$48 \div 6 = \square$

$\square \times 6 = \square$

$81 \div 9 = \square$

$\square \times 9 = 81$

$28 \div 4 = \square$

$\square \times 4 = 28$

$21 \div 7 = \square$

$\square \times 7 = 21$

$18 \div 3 = \square$

$\square \times 3 = 18$

$15 \div 3 = \square$

$\square \times 3 = 15$

$54 \div 9 = \square$

$\square \times 9 = 54$

$35 \div 5 = \square$

$\square \times 5 = 35$

$72 \div 9 = \square$

$\square \times 9 = 72$

$25 \div 5 = \square$

$\square \times 5 = 25$

$63 \div 7 = \square$

$\square \times 7 = \square$
