by _____

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Read and number in order.

____/5

Go green at home or away

Have you ever wondered what you can do to help the environment? There are many actions you can take. Follow these easy, green tips and start right now!

- ☐ One more thing you can do at home is hang your wet clothes when you wash them. Don't use a drying machine. You can install a clothesline indoors, in the bathroom or in a place where no one can see it. Tell your parents about this idea. I'm sure they will like it!
- ☐ Another place you help the environment away from home is at your school. Remember to use a reusable lunch container. This is better than using plastic bags that you usually throw away.
- ☐ First, think about your routine at home. This is the place where you spend most of your time. So, if you are leaving a room, remember to turn off the lights! Water is essential at home and in our lives so don't waste it. When you take a shower, set a limit of time to do so. Try doing it as you listen to your favorite song! That's all the time you have! This will make you save water.
- ☐ As you can see, these are easy things you can do to help the planet. What are you waiting for to go green?
- ☐ Now, read these tips to go green when you're not at home. If you are going out, take a reusable water bottle with you. You can save money and help the environment because you don't need to buy bottled water when you get thirsty.

2 Read again and complete using words from the text.

____/5
