9. Drivers in Phoenix complained about severe _____ (jam / traffic) on main roads.
10. The driver received a heavy fine for ignoring basic _____ (road / law) regulations.

READING TEXT: URBAN TRANSPORT AND LIFE CHOICES

Modern urban development forces people to rethink how they manage daily travel, personal finance, and healthcare. In many large cities around the world, municipal authorities are transforming public infrastructure to reduce congestion and promote healthier lifestyle choices. For instance, several administrative regions in Europe have introduced expansive vehicle-free zones and upgraded extensive cycle paths. Transport experts argue that encouraging cycling and walking not only reduces air pollution levels but also helps citizens avoid chronic health conditions such as high blood pressure and severe back pain.

Simultaneously, financial structures in urban centers are changing rapidly. Cashless payment systems are becoming the standard option for daily commerce, including public transit fares, grocery purchases, and pharmacy transactions. Economic analysts state that moving away from physical currency helps financial institutions control operational expenses while providing faster services. However, some financial experts warn that relying exclusively on digital banking apps and credit cards can lead to uncontrolled consumer spending. Many individuals do not monitor their daily expenditures carefully, which causes them to accumulate substantial personal debt.

Ultimately, navigating modern city life requires a conscious balance. Citizens must make wise decisions regarding their physical routines and financial discipline. Medical professionals advise people to engage in daily exercise and avoid prolonged periods of inactivity. At the same time, financial advisors recommend keeping detailed records of monthly purchases to maintain overall financial stability.

SECTION 5: READING - TRUE (T), FALSE (F), OR DOES NOT SAY (DS)

1. Municipal authorities are changing public infrastructure in several major cities.
2. Asian cities were the first to eliminate motor vehicles from downtown areas.
3. Cycling and walking can assist citizens in preventing chronic health issues.
4. High blood pressure is the most common medical issue reported by city residents.
5. Cashless payment platforms are now widely used for purchasing daily groceries.
6. Paper banknotes will be illegal in all European nations within five years.
7. Financial institutions save money on operations by reducing physical currency use.
8. Digital banking applications always prevent consumers from overspending.
9. Failing to track daily expenditures can lead to accumulated debt.
10. Medical professionals suggest that citizens should avoid long periods of physical inactivity.
