Question: 171 CertyIQ

HOTSPOT
-
Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant.
You have a Microsoft 365 subscription.
You plan to use Windows Autopilot to deploy new Windows devices.
You plan to create a deployment profile.
You need to ensure that the deployment meets the following requirements:
•Devices must be joined to AD DS regardless of their current working location.
•Users in the marketing department must have a line-of-business (LOB) app installed during the deployment.
The solution must minimize administrative effort.
What should you do for each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Devices must be joined to AD DS regardless of their current working location:

- Deploy Always On VPN.
- Install the Intune connector for Active Directory.
- Modify the Autopilot deployment profile.
- Edit the Co-management settings in Intune.

The marketing department users must have an LOB app installed during the deployment:

- Modify the Autopilot deployment profile.
- Create a Microsoft Intune app deployment.
- Create a device configuration profile in Intune.

•Mark devices with no compliance policy assigned as: Compliant
•Enhanced jailbreak detection: Enabled
•Compliance status validity period (days): 20
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 is marked as compliant.	○	○
Device2 is marked as compliant.	○	○
Device3 is marked as compliant.	○	○

You have business requirements for securing your Windows 11 environment as shown in the following table.

Requirement	Detail
Requirement1	Ensure that Microsoft Exchange Online can be accessed from known locations only.
Requirement2	Lock a device that has a high Microsoft Defender for Endpoint risk score.

What should you implement to meet each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Requirement1:

- A conditional access policy
- A device compliance policy
- A device configuration profile

Requirement2:

- A conditional access policy
- A device compliance policy
- A device configuration profile

Question: 177 CertyIQ

HOTSPOT
-
You have a Microsoft 365 subscription that contains two security groups named Group1 and Group2. Microsoft 365 uses Microsoft Intune Suite.
You use Microsoft Intune to manage devices.
You need to assign roles in Intune to meet the following requirements:
•The members of Group1 must manage Intune roles and assignments.
•The members of Group2 must assign existing apps and policies to users and devices.
The solution must follow the principle of least privilege.
Which role should you assign to each group? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Group1:

- Help Desk Operator
- Intune Role Administrator
- Intune Service Administrator
- Policy and Profile Manager

Group2:

- Help Desk Operator
- Intune Role Administrator
- Intune Service Administrator
- Policy and Profile Manager

Name	Assigned to
Policy1	Group1
Policy2	Group1, Group2
Policy3	Group3
Policy4	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 is marked as compliant.	○	○
Device2 is marked as compliant.	○	○
Device3 is marked as compliant.	○	○
