

1. Make sentences by drawing lines.

If it's sunny

I'll ride down the hills on
my sledge.

If it's very windy

I'll take an umbrella with
me.

If it snows

I'll have a picnic in the
park with my family.

If it rains

I'll hide under my blanket.

If there's ice on the
lake

I'll try to take a picture of
it.

If there's a storm in
the night

I'll take my kite to the top
of a hill and fly it.

If there's a rainbow in
the sky

I'll go skating with my
friend there.

2. Jane is talking to her brother, David. Read the conversation and Drag and drop the best answer from A-H. You do not need to use all the answers.

Example

Jane: It's Mum's birthday at the weekend!

David: A

Questions

Jane: I think she'd like a necklace.

David: _____

Jane: OK. We could catch a bus to the High Street.

David: _____

Jane: Just outside the post office, but I haven't got any money. Have you?

David: _____

Jane: How shall we pay for our tickets, then?

David: _____

Jane: We can't do that!

David: _____

A. I know! What shall we get her?

E. Haven't you got one?

B. Where's the bus stop?

F. Oh no, I don't think I have!

C. So, have you got any ideas?

G. I didn't go there.

D. Let's ask Mum for some.

H. Let's buy her one, then.

3. Read the text below.

VIDEO GAMES ARE BAD FOR YOU. NO, WAIT, I MEANT *GOOD* FOR YOU.

'Video games are bad for you.' I'm sure you've heard that a few times. Well, if you're playing all day and all night then it's probably true. It can be very hard to stop: just one more level, just one more life, just five more minutes.

Many kids spend way too much time playing these games. They go to bed late and can't concentrate at school. (I'm sure you don't do that.) If you're having problems sleeping, because you're spending too long playing video games, you might need to think about reducing your screen time.

We've all heard the disadvantages, but if I tell you there are advantages, will you believe me?

- Video games can make our brains grow. It's true! There was an experiment where people played a video game for 30 minutes a day. They discovered that the bits of the brain that help you organise your thoughts, know where you are, and make decisions were all bigger.
- They can improve your eyesight. In another experiment, scientists tested the eyesight of their students. They then asked the students to play video games for around ten hours, over a month, and tested their eyesight again. Weirdly, their eyesight was better.
- Wait, there's more! You know when you're playing these games you have to make hundreds of little decisions? If I do this, will I lose a life? If I go straight ahead I'll have to fight the dragon, etc. It's quite simple really: the more decisions you make in the virtual world, the faster you can make decisions in the real world.

So, you see! Gaming is good for you!

A. Read the statement and make two lists:

I agree with the statement because:

I disagree with the statement because:

B. Write a short paragraph about why "Video games are bad for you." Give at least three supporting ideas as the text below.
