

Year 5 English - Environmental Sustainability

Name: _____

Class: _____

Task

Read the digital text carefully. Find information that can be used as evidence for your eco-campaign.

Text Box: For Analysis

Plastic waste is a common problem in many schools. Pupils may use plastic bottles, food wrappers and plastic bags every day. When these items are thrown away carelessly, they can make the school environment dirty. Plastic waste can also block drains and harm animals if it reaches rivers or other natural areas.

There are several ways to reduce plastic waste at school. Pupils can bring reusable water bottles and food containers from home. They can also use recycling bins correctly and avoid taking unnecessary plastic bags. Small actions by many pupils can help make the school cleaner and reduce the amount of plastic waste produced.

Part A: Find Specific Information

My answer

1. What environmental problem is discussed? _____
2. Name one cause of the problem. _____
3. What is one effect of the problem? _____
4. What solution is suggested? _____
5. What action can pupils take? _____

Part B: Find Three Useful Details

Choose three details from the text that could support your campaign.

Detail	Why is this detail useful for our campaign?
Detail 1:	
Detail 2:	
Detail 3:	

Part C: Digital Vocabulary Detective

Find an unfamiliar word from the text.

Unfamiliar word: _____

What I think it means: _____

Digital resource I used: _____

Meaning I found: _____

How the meaning helps me understand the text: _____

Part D: Evidence Selection

Put a ✓ beside information that is useful for an eco-campaign.

- ☐ Information directly related to the environmental problem
- ☐ A relevant fact or detail
- ☐ A realistic solution
- ☐ Information unrelated to the problem
- ☐ A possible action pupils can take
