

Look at the penguin!
They are birds and have
feathers, but they can't fly.
Their feathers are black and
white.
They live in cold places.
They eat fish. They swim to
catch fish.

When they walk on land, they
waddle and look clumsy.
However, in the water, they are
great swimmers. They like to
swim.

Baby penguins are usually gray,
brown, or fluffy white. They are
called chicks.

What colour are their feathers?

Where do penguins live?

How do they walk on land?

Can penguins fly?

How do they look like when they walk?

What do penguins eat?

How do they catch the fish?

What are baby penguins called?

What colour are the chicks?
