Instructions

You **may not** use a calculator to answer any questions in this test.

Questions and answers

You have **50 minutes** to complete this test.

Follow the instructions for each question.

Work as quickly and as carefully as you can.

If you need to do working out, you can use the space around the question.

Some questions have a method box like this:

Diagram illustrating a method box. A rounded rectangle on the left contains the text "Show your method". To its right is a large grid of 20 columns and 10 rows. In the bottom right corner of the grid is a smaller, empty rectangular box.

For these questions you may get a mark for showing your method.

If you cannot do one of the questions, **go on to the next one**.

You can come back to it later, if you have time.

If you finish before the end, **go back and check your work**.

Marks

The number under each line at the side of the page tells you the maximum number of marks for each question.

1

Olivia is counting in 7s from 0 to 70

Circle the numbers she will say.

17 1 7 28 57 63

1 mark

2

Max makes a number on a place value grid.

Thousands	Hundreds	Tens	Ones
			

What number has Max made?

1 mark

Max adds some hundred counters.

He has now made the number 2,954

How many hundred counters did Max add?

1 mark

3

Complete the number lines.

11

Here are part of two shapes.

Complete each shape so that it is symmetrical about the mirror line.

Use a ruler.

Shape A

Shape B

2 marks

Which of the completed shapes has the largest area?

Circle your answer.

Shape A

Shape B

Explain your answer.

1 mark

12

Here are four angles.

Use the letters to order the angles from smallest to largest.

A

B

C

D

smallest

largest

1 mark

Use the words to complete the sentences.

acute

right

obtuse

Angle A is a _____ angle.

Angle B is an _____ angle.

Angle C is an _____ angle.

2 marks

13

James plots 3 points on a grid.

Write down the coordinates of point A.

(,)

1 mark

James plots another point at (1 , 3)

Plot this point.

1 mark

James joins the points to make a quadrilateral.

Circle the name of the quadrilateral that he has drawn.

Rectangle

Parallelogram

Trapezium

1 mark

The shape is translated 2 squares right and 1 square up.

What are the new coordinates of point A?

(,)
