

Question: 52

HOTSPOT

-

You have an Azure AD tenant that contains a user named User1. User1 is assigned the User Administrator role. You need to configure External collaboration settings for the tenant to meet the following requirements:

- Guest users must be prevented from querying staff email addresses.
- Guest users must be able to access the tenant only if they are invited by User1.

Which three settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Guest user access restrictions:

Guest users have the same access as members (most inclusive)

Guest users have limited access to properties and memberships of directory objects

Guest user access is restricted to properties and memberships of their own directory objects (most restrictive)

Guest invite restrictions:

Anyone in the organization can invite guest users including guests and non-admins (most inclusive)

Member users and users assigned to specific admin roles can invite guest users including guests with member

Only users assigned to specific admin roles can invite guest users

No one in the organization can invite guest users including admins (most restrictive)
