

PART 5
[8 marks]

Questions 33 to 40

Read the text below. Eight sentences have been removed from the text.

For **33** to **36**, choose from the sentences (**A – D**) to fit each gap.

For **37** to **40**, choose from the sentences (**E – H**) to fit each gap.

Exploring Other Universes

Many people look at the night sky and feel curious. They see stars, the moon, and sometimes planets. Space is full of amazing things, and we still have many questions. What is out there? Are we alone? These questions make scientists and explorers want to learn more about space.

Space is very big and full of mystery. Scientists study space to learn more about stars, planets, and other worlds. **(33)** _____ .

Some scientists think parallel universes might exist. **(34)** _____. They believe that space is not just one universe, but many.

Space missions send rockets, satellites, and astronauts into space. **(35)** _____. Maybe one day, we will find signs of a parallel universe.

In the future, space travel may become easier. **(36)** _____. Learning about space and the idea of parallel universes helps us dream big and ask important questions about life and the universe.

A	These missions help us understand how the universe works.
B	A parallel universe is an interesting idea.
C	A parallel universe is a place like our world, but different
D	We might even visit other worlds.
